David Daw

SKILLS

Firebase, GraphQL, Socket.io, typescript, React Native, React, Vue, Cypress, Figma, Sass, Express

PROJECTS

Ground Itself

Solo Project | 60 Hours | June-Sept 2023 | [Repo Link](#) | [Frontend Deployment](#)

- Used socket.io to sync game state between users in real time.
- Created a custom backend for managing game state using express.
- Converted game flow and design from an offline tabletop game into an online version.

Player's Reference: Romeo and Juliet

Contract Project | 80 Hours | May 2023-Feb 2024 | [Repo Link](#) | [Frontend Deployment](#)

- Designed a custom content management system to enter data and metadata for the play.
- Created a custom data structure to store and organize dozens of potential pieces of metadata for each line in the play's text.
- Implemented a customizable design to display notes and other metadata about the play contextually as users need them.

Oblique Strategies

Solo Project | 30 Hours | July 2022 | [Repo Link](#) | [Deployment](#)

- Implemented user authentication and data storage using firebase.
- Created an Express server for api calls.
- Incorporated project manager feedback through ongoing code reviews.
